What would happen if SSNAP ended? 7

How do SSNAP collect data?

SSNAP collect data about the **care** stroke survivors receive for the first **6 months** after their stroke.

Hospital staff collect data for SSNAP.

Hospital staff send data to SSNAP using a **secure website**.

How do SSNAP store data?

Hospitals send data to SSNAP on a **secure website**.

The SSNAP website is run by a company called **Net Solving Ltd.**

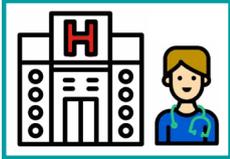

The SSNAP team and Netsolving Ltd. **do not see** confidential patient information.

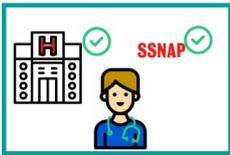

Who can access SSNAP data?

Only staff involved in **your stroke care** can see the data.

The hospital staff are chosen by the **hospital**.

The hospital staff must be **approved** by the hospital and by SSNAP.

Hospital staff must agree to **terms and conditions** that protect patient information.

Hospital staff must enter a **password** to see SSNAP data.

How do SSNAP use my data?

The SSNAP team work at **Kings College London** (KCL).

The SSNAP team process data and make **reports**.

SSNAP reports show **how well** each stroke care team is performing.

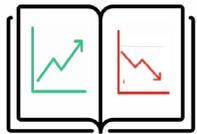

The SSNAP team **do not see** your confidential information when making reports.

Will SSNAP publish my data in reports?

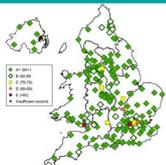

Individual patient data **are not** published in SSNAP reports.

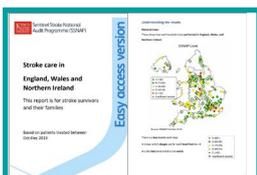

SSNAP reports **summarise** all the data from one team's patients.

E.g. “the percentage of **all** patients that had a brain scan”.

SSNAP also report a **summary** of all the data from **England, Wales, and Northern Ireland.**

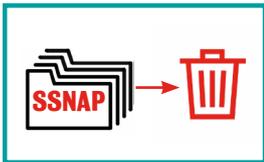

Click here for how to download **SSNAP Easy Access Version Reports (EAV Reports).**

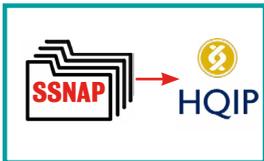

What would happen if SSNAP ended?

The **H**ealthcare **Q**uality Improvement **P**rogramme (**HQIP**) **control** SSNAP data.

If SSNAP ended, HQIP would ask that all patient-identifiable data was **deleted**.

The rest of the data would be **returned to HQIP** at the end of the contract.
