

# National data collection of care received by stroke patients

This **hospital** is involved in a national project to make **stroke** care **better** by collecting information about your stroke care.

We collect information about all **stroke** patients in this hospital and **what care they receive**. This **does not** include any confidential information.

This information is used to **improve stroke care** in this hospital. This project is called the **Sentinel Stroke National Audit Programme (SSNAP)**.

Scan here for **more information** about SSNAP.

Or ask a member of the stroke team for a **leaflet**.

Scan here for links to the **national clinical guideline** for stroke for patients.
