2016 Full National
Clinical Guidelines
for Stroke

2016 Patient
Guidelines

Or [click here](#) for the online version of the patient guidelines

The patient version of the full guideline describes the key recommendations from the Guideline for patients to have as an “easy read”.

It has been produced by patients who have selected some key issues to help patients to understand what to expect from people giving them care. This version of the guidelines was highly commended in the BMA Patient Information Awards 2017.
