# SSNAP Core Dataset for Teams in Northern Ireland

For queries, please contact ssnap@kcl.ac.uk
Webtool for data entry: www.strokeaudit.org

A log of changes made to the SSNAP Core Dataset for Teams in Northern Ireland can be found on page 11 of this document, available here.

The only difference in the dataset for teams in Northern Ireland is that patient identifiable information cannot be entered onto the webtool. This is due to the different legal requirements for Northern Ireland. We will alert all participants in Northern Ireland if the situation changes and patient identifiable information becomes permissible to enter, but this is most likely to occur on a trust-by-trust basis.

Teams in Northern Ireland are encouraged to keep note of the patient identifiable information alongside the patient audit number (assigned by the webtool when a new record is created) within their trust, so that it is easier to refer back to patient notes if necessary.
