

National data collection of care received by stroke patients

This **hospital** is involved in a national project to make **stroke** care **better** by collecting information about your stroke care.

We collect information about all **stroke** patients in this hospital and what care they receive. This includes confidential information.

This information is used to improve **stroke care** in this **hospital**.

This project is called the **Sentinel Stroke National Audit Programme (SSNAP)**.

For more **information** about this project please ask a member of the stroke team for a **leaflet**.
